

# ARDEN GRANGE™

nutrition without compromise

## dog product guide

**NATURALLY**   
**HYPOALLERGENIC**

we do not include wheat, gluten, beef, soya, dairy products, artificial colours, flavours or preservatives in any of our recipes

## about us

Arden Grange is a British owned, independent, family run business based just outside Brighton, which has been producing super premium pet foods since 1996. The owners are renowned for their experience and expertise in the dog world, and have been breeding and showing their highly acclaimed Ardenburg German Shepherds for over 30 years.

Ever since Arden Grange was first launched, we have been building on our knowledge and experience, developing nutritionally complete dog and cat foods. They are formulated to very high standards and attention is paid to the proportions and diversity of sources of the nutrients, so they provide optimum nutrition for your dog or cat.

Arden Grange provides optimum nutrition, promoting health and vitality throughout your pet's lifetime with wholesome ingredients, excellent palatability and visible results in the condition of the animal.

Our 'Not Tested on Animals Guarantee' logo, which you will find on all our packaging and literature, demonstrates our commitment to the welfare of animals. We have not and never will fund any invasive research projects conducted in relation to the development or refinement of pet foods manufactured or sold by our company.

For more information about our products, visit our website **[www.ardengrange.com](http://www.ardengrange.com)**. If you have any nutritional or product related enquiries please call our office on **01273 833390** or email us at **[enquiries@ardengrange.com](mailto:enquiries@ardengrange.com)**.

**Arden Grange – nutrition without compromise**

## nutrition without compromise

Arden Grange foods contain a unique blend of ingredients, incorporated into recipes which are designed to ensure your dog is always ready for work and play.

We are proud of the foods that we manufacture and have taken care to develop recipes designed to benefit and nourish your dog. Our ingredients are chosen for quality, consistency and nutrient value. Arden Grange pet foods are manufactured in the UK to a fixed recipe, and we will never reduce the quality of our ingredients because of market prices. At Arden Grange, the production of wholesome pet food using named ingredients has always been our ethos. Every recipe is created by nutritionists and contains prebiotics FOS & MOS, nucleotides, added Omega 3 fatty acids, glucosamine, chondroitin and MSM.

Arden Grange pet foods are labelled in accordance with the strict legislation imposed by EU regulations for the retail sale of animal feeds. All packaging includes information on the ingredients and nutrients in our food. This information is a true reflection of what is included in each recipe so that you can make an informed choice of diet for your beloved pet.

Additionally, all Arden Grange products are naturally hypoallergenic and preserved using mixed tocopherols, vitamin E and rosemary extract. We do not include wheat gluten, beef, soya, dairy products, artificial colours, flavours or preservatives in any of our recipes.

## our kibble

At Arden Grange, we know that good nutrition is vitally important, but this has little meaning if your pet refuses to eat the diet that you have chosen. This is why our dog and cat kibbles are specially designed to ensure maximum palatability, and all of our recipes are taste-tested by our own pets in non-invasive trials.

In designing our kibbles, we have taken into account all of the following:

- **Texture** – Texture is important to cats and dogs. Puppies and smaller dogs prefer smooth kibbles. Cats are deterred by rough textures.
- **Density** – The correct density of the kibble ensures that it is satisfactorily crunchy when fed dry, but easily soaked for those pets preferring a moist diet.
- **Size** – The kibbles are of an appropriate size and shape for the species and age group at which they are marketed.
- **Taste Preference** – Our kibbles are coated with a delicious natural coating that is free from any added salts or sugars.

## natural supplements

Each of our recipes contains its own unique blend of nutrients and natural supplements to help promote the optimum health, vitality and condition of your pet, including:

**Cranberry Extract** – Cranberries may aid in maintaining urinary tract health. They also have antioxidant properties and may be effective against certain bacteria and fungi.

**Nucleotides** – Nucleotides play an important role in the metabolism of the body and may benefit both the digestive system and the immune system.

**Prebiotics FOS & MOS** – Prebiotics promote the growth of friendly gut bacteria that in turn reduce the build-up of harmful bowel flora.

**Yucca Extract** – Yucca has antioxidant properties and may also help to reduce faecal and body odour.

**Natural Dietary Antioxidants** – A special blend of antioxidant vitamins, minerals and plant extracts to help to protect the body from the damage caused by free radicals. Dietary antioxidants may also support dental health.

**Calcium, Phosphorous and Vitamin D** – These important vitamins and minerals are included at the correct level to promote safe, steady growth in puppies, and support strong supple joints in dogs of all ages.

**Glucosamine, Chondroitin and MSM** – These nutrients are integral to the development, maintenance, and reparation of cartilage and joints. Together they may help to promote mobility and joint longevity.

**Omega-3 and Omega-6 Fatty Acids** – Derived from high quality salmon oil and linseed, the correct ratio of these essential fatty acids is associated with benefits to the heart, digestion, skin and immune system.

**Natural Preservatives** – Every Arden Grange recipe is stabilised naturally with mixed tocopherols (vitamin E) and rosemary extract.

**L-Carnitine** – L-Carnitine may help to increase the conversion of fat to energy and maintain lean body mass.

As a responsible and ethical company, Arden Grange fully appreciates the caution that must be taken when discussing the potential benefits of nutritional supplements.

It is against the law to make medical claims. Whilst the supplements used are safe and natural, and may be beneficial to some of the cats and dogs fed on Arden Grange, we must highlight that their inclusion is not a substitute for veterinary intervention in the case of a sick animal.

## nutritional benefits

### **fresh**

We include fresh meat and fish across our range and the recipes are made to a fixed formula, so you can rest assured that we will never reduce the quality of our ingredients because of market prices.

### **palatable**

Palatability is of key importance and the high proportion of meat and fish in our recipes helps to ensure that dogs enjoy the taste of Arden Grange.

### **naturally preserved**

Some sensitive animals may react to artificial additives and preservatives, so we use only vitamin E and rosemary to stabilise our food.

### **botanical supplements in every recipe**

We use cranberry, rosemary and yucca extract in all of our dry products and the Partners canned range includes seaweed, cranberry and yucca. These safe plant extracts have powerful natural antioxidant properties. In conjunction with the vitamins and minerals we use, our diets may offer good protection against the potentially harmful effects of free radicals produced by the body, especially during times of stress or illness.

### **additional special ingredients**

The prebiotics FOS & MOS, nucleotides, omega-3 & 6, glucosamine, chondroitin and MSM are all present in all of our dry recipes. These special ingredients may help promote digestive, immune, skin and joint health.

## healthy ingredients

Krill are crustaceans similar to very small shrimps. Krill meal is a superior and outstandingly pure source of the omega-3 fatty acids EPA and DHA which have many recognised health benefits, and are important to the nervous system, heart and eyes as well as many other cells, tissues and organs of the bodily systems. EPA and DHA's anti-inflammatory properties are also well documented.

Krill meal is extra special since it contains omega-3 fatty acids that are bound to phospholipids (rather than triglycerides); a form which ensures that tissue uptake is particularly effective. The presence of choline is beneficial since this nutrient supports cell structure and function, gene regulation and fat metabolism. Astaxanthin is also contained within krill meal, and this has very powerful antioxidant and anti-inflammatory properties (to help neutralise free radicals).

**Krill meal is also a very nutritionally valuable source of protein with an excellent essential amino acid profile.**

The meal is created from Antarctic species of krill which is both abundant and sustainable. Krill is fished using special technology to ensure that it is brought aboard live and fresh, and without netting any of its natural predators which include sea birds, seals and penguins; or any species other than the selected krill.

**For more information about krill please visit [www.ardengrange.com](http://www.ardengrange.com)**

## recommended feeding charts

### using the feeding charts

The Arden Grange feeding charts will give an estimation of the daily feeding quantity based on your dog's weight. It is important to remember however that these figures are guidelines only, and there are several factors to be taken into account when assessing your pet's nutritional requirements:

- **Activity level** – Working dogs and those with high activity levels require more calories for energy than those leading a less active lifestyle.
- **Temperament** – Stressed animals burn off more calories than relaxed ones.
- **Metabolism** – Every animal is an individual with his or her own speed of metabolism; this means that two dogs of the same age, breed and weight could have different daily calorie requirements.

In order to provide the correct portions, it is also helpful to assess your pet's appetite, visual appearance and stools. Whilst poo watching does not sound particularly pleasant, it is one of the best indicators of health. Increased frequency of passing faeces, production of large quantities of stools or loose motions are often frequent signs that an animal is receiving more food than he or she requires.

It is important to obtain an accurate weight for your dog, and also to weigh out the food. Guessing on both accounts gives a large margin of error.

If you require any assistance in calculating the correct feeding quantities for your dog, please contact our nutrition adviser who will be happy to help.

small dog	3-12 weeks	3-6 months	6 months +
e.g. Toy Poodle, Yorkshire Terrier	weaning/puppy	weaning/puppy	weaning/puppy
			adult dog
			light dog
medium dog	3-12 weeks	3-9 months	9 months +
e.g. Cocker Spaniel, Border Collie	weaning/puppy	puppy junior	adult dog
			light dog
large dog	3-8 weeks	2-12 months	12 months +
e.g. Labrador, German Shepherd	weaning/puppy	puppy junior large breed	adult dog
			light dog
giant dog	3-8 weeks	2-18 months	18 months +
e.g. St Bernard, Great Dane	weaning/puppy	puppy junior large breed	adult dog
			light dog

## choosing a healthy dog food

When selecting a diet for your dog, it's important to remember that although dogs are scientifically classed as omnivores, they are chiefly equipped for digesting animal proteins and fats rather than overly large volumes of carbohydrate-rich ingredients such as cereals and grains. Look for a food that contains high levels of good quality named meat or fish sources. For dogs with normal digestion, a variety of these protein sources is of benefit as they help to ensure an excellent amino acid profile, thus supplying all of those essential building blocks that the body needs to support its extensive structural and functional demands.

Fresh meat and fish are naturally less processed than meals, and for this reason are preferred by some owners. They do however lose moisture (and thus weight) during the kibble manufacturing process. An ideal balance is a pet food that contains both fresh meat or fish and meat or fish meal – this provides the best of both worlds.

A super-premium pet food manufacturer like Arden Grange will calculate losses of water and also fragile components such as some of the vitamins beforehand, to ensure that the correct level of valuable nutrients is achieved.

Like any other ingredient, vitamins and minerals can vary in quality and in how well the body can absorb them. Arden Grange prefers to derive these nutrients naturally where possible and use stable forms that are easily utilised within the body. Vitamin C, E and beta carotene all have powerful antioxidant properties and may help provide protection against the harmful effect of free radicals.

## changing pet food brands

For a successful diet change, we recommend following the feeding pattern below. The daily feeding volume may be split into two feeds or more, depending upon your dog's requirements and the proportions of ARDEN GRANGE increased over the first week as illustrated.

**TOP TIPS:** For those dogs who do not make eating a priority, here are some additional points:

- Reduce the number of tit-bits given during the introductory period.
- If your dog has been used to eating wet food, moisten the kibble with warm water.

day 1-2	75% original diet 25% arden grange
day 3-4	50% original diet 50% arden grange
day 5-6	25% original diet 75% arden grange
day 7	100% arden grange

## features and benefits

Product:	Key features:	Key benefits:
weaning/puppy:	optimum mineral balance	easy to soak to make a 'puppy porridge'
puppy/junior:	highly digestible	promotes steady growth and development
puppy/junior large breed:	larger kibble with added joint supplements	promotes steady growth and development and bigger kibble helps slow down eating
adult chicken:	highly digestible and palatable	an ideal maintenance diet for small and medium sized dogs
adult lamb:	highly digestible and palatable	ideal alternative protein source to chicken
mini adult:	small kibble size	easier to eat for small dog
adult salmon:	ideal ratio of omega 3 and 6 offering extra skin & coat support	Ideal alternative protein source to chicken and good for dogs with sensitive skin
adult pork:	this egg and maize free diet is an excellent novel protein source	an additional sensitive diet, suitable for dogs that have allergies to egg and maize
adult large breed:	larger kibble size and extra joint support supplements	helps slow down eating to avoid choking and promotes optimal joint health
performance:	enhanced maintenance diet for highly active dogs	increased levels of natural antioxidants inhibit the formation of destructive free radicals
premium:	maize free and with high fresh meat content	highly palatable for the more discerning dog
prestige:	calorie and energy dense for dogs requiring a more concentrated diet	highly palatable and ideal for convalescing dogs and lactating bitches
sensitive:	cereal & grain free diet, ideal for sensitive skins and delicate digestions	ideal for dogs with allergies to other protein sources, a gentle maintenance and care diet
light:	a diet lower in calories, protein and oil	added L-Carnitine to increase the conversion of fat to energy whilst still providing a satisfying meal
senior:	significantly higher levels of joint supplements	extra protection against age related conditions

# weaning/puppy ●

## rich in fresh chicken & rice

Arden Grange WEANING/PUPPY rich in fresh chicken & rice is a complete food for weaning puppies of around three weeks of age that is also suitable for pregnant and lactating bitches. It is a high calorie diet with just the right balance of calcium, phosphorous and vitamin D that puppies need during this rapid growth stage. The delicious small kibble is also ideal for soaking to make a highly digestible puppy porridge.

**Analytical Constituents:** Crude Protein 32%, Fat Content 20%, Crude Ash 7%, Crude Fibres 2.5%, Calcium 1.45%, Phosphorous 1.05%, Omega-3 0.95%, Omega-6 2.87%.

**Composition:** Chicken (Chicken meat meal 26%, fresh chicken 18%), rice (14%), maize, refined chicken oil, whole dried egg, beef pulp, fish meal, chicken digest, krill, yeast, minerals, whole linseed, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 24,000 IU, Vitamin D3 1,800 IU, Vitamin E 320 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 667mg, Copper chelate of amino acid hydrate 133 mg, Manganese chelate of amino acid hydrate 89 mg, Calcium iodate anhydrous 3.2 mg, Selenised Yeast (inactivated) 87 mg. Antioxidant (rosemary extract).

**Feeding quantities:** See chart on page 15 for guidance.

**Always ensure fresh, clean drinking water is available.**

**STORE IN A COOL DRY PLACE.**

### feeding recommendations:

Arden Grange WEANING/PUPPY should first be soaked with a little warm water and mixed with a fork to form a smooth porridge that is just the right consistency for lapping. We recommend that puppies are fed by the portion control method, which allows you to monitor their individual intake more accurately. Leave the porridge down for around 15 minutes each time, after which you should remove any uneaten food (or give it to their mother). This routine should be repeated for each mealtime, usually four times per day or more.

# puppy/junior ●

## rich in fresh chicken

Arden Grange PUPPY/JUNIOR rich in fresh chicken is a complete, super premium pet food for small and medium breed puppies and adolescent dogs. It has been formulated with the optimal balance of vitamins and minerals to encourage steady, healthy growth and development. A generous helping of fresh chicken is included to provide a delicious and easily digestible source of protein.

**Analytical Constituents:** Crude Protein 29%, Fat Content 18%, Crude Ash 7%, Crude Fibres 2.5%, Calcium 1.3%, Phosphorous 0.85%, Omega-3 1.11%, Omega-6 2.66%.

**Composition:** Chicken (fresh chicken 18%, chicken meat meal 18%), rice, maize, refined chicken oil, whole dried egg, beef pulp, fish meal, chicken digest, whole linseed, krill, yeast, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 21,000 IU, Vitamin D3 1,575 IU, Vitamin E 280 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 583mg, Copper chelate of amino acid hydrate 117 mg, Manganese chelate of amino acid hydrate 78 mg, Calcium iodate anhydrous 2.8 mg, Selenised Yeast (inactivated) 76 mg. Antioxidant (rosemary extract).

**Feeding quantities:** As well as your puppy's body weight; age, activity level, temperament, digestion and rate of metabolism may influence the amount of food required. See chart on page 15 for guidance. **Always ensure fresh, clean drinking water is available. STORE IN A COOL DRY PLACE.**

### feeding recommendations:

Arden Grange PUPPY/JUNIOR is ideal to feed from eight weeks until your puppy has reached adult height. After this time you may change to one of the Arden Grange ADULT diets.

# puppy/junior large breed ● with fresh chicken & rice

Arden Grange PUPPY/JUNIOR LARGE BREED is a complete, super premium pet food for large breed puppies and adolescent dogs. It contains delicious fresh chicken and has been formulated to meet the nutritional requirements for steady, healthy growth and development. Boosted levels of joint supplements have been added to account for the extra demands placed on large and giant breeds.

**Analytical Constituents:** Crude Protein 26%, Fat Content 16%, Crude Ash 7%, Crude Fibres 2.5%, Calcium 1.4%, Phosphorous 0.95%, Omega-3 0.84%, Omega-6 2.92%.

**Composition:** Chicken (chicken meat meal 30%, fresh chicken 5%), rice (19%), maize, refined chicken oil, beet pulp, chicken digest, krill, minerals, yeast, whole dried egg, whole linseed, prebiotic FOS, prebiotic MOS, glucosamine (370mg/kg), MSM (370mg/kg), chondroitin (260mg/kg), yucca extract, cranberries, nucleotides.

# adult ●

## with fresh chicken & rice

Arden Grange ADULT with fresh chicken & rice is a complete, super premium pet food for normally active adult dogs. It contains fresh chicken which is a delicious and highly digestible protein source.

**Analytical Constituents:** Crude Protein 25%, Fat Content 15%, Crude Ash 7%, Crude Fibres 2.5%, Calcium 1.1%, Phosphorous 0.75%, Omega-3 0.99%, Omega-6 2.72%.

**Composition:** Chicken (chicken meat meal 27%, fresh chicken 5%), rice (26%), maize, refined chicken oil, beet pulp, chicken digest, whole dried egg, krill, yeast, whole linseed, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 18,000 IU, Vitamin D3 1,350 IU, Vitamin E 240 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 500mg, Copper chelate of amino acid hydrate 100 mg, Manganese chelate of amino acid hydrate 67 mg, Calcium iodate anhydrous 2.4 mg, Selenised Yeast (inactivated) 65 mg. Antioxidant (rosemary extract).

**Feeding quantities:** As well as your dog's body weight; age, activity level, temperament, digestion and rate of metabolism may influence the amount of food required. See chart on page 21 for guidance. **Always ensure fresh, clean drinking water is available. STORE IN A COOL DRY PLACE.**

# adult & MINI adult ●●

## with fresh lamb & rice

Containing Lamb, Arden Grange ADULT rich in lamb & rice and MINI rich in lamb & rice diets are great for dogs requiring a delicious and digestible alternative to chicken. The MINI has a smaller kibble, perfectly suited for all toy and small breeds.

**Analytical Constituents:** Crude Protein 25%, Fat Content 16%, Crude Ash 8.9%, Crude Fibres 2.5%, Calcium 1.6%, Phosphorous 0.9%, Omega-3 0.71%, Omega-6 3.26%.

**Composition:** Lamb (lamb meat meal 29%, fresh lamb 5%), rice 26%, maize, refined chicken oil, beet pulp, whole dried egg, chicken digest, yeast, whole linseed, krill, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 18,000 IU, Vitamin D3 1,350 IU, Vitamin E 240 IU.

**Feeding quantities:** As well as your dog's body weight; age, activity level, temperament, digestion and rate of metabolism may influence the amount of food required. See chart on page 21 for guidance. **Always ensure fresh, clean drinking water is available. STORE IN A COOL DRY PLACE.**

# adult ●

## fresh salmon & rice

Arden Grange ADULT fresh salmon & rice is suitable for normally active adult dogs. Salmon provides an excellent quality protein source whilst also being highly digestible and palatable. Salmon is gentle on the digestion and may be of particular benefit to the skin and coat. The omega-3 fatty acids naturally present in fish oil may help to reduce the amount and effects of histamine produced in response to allergens.

**Analytical Constituents:** Crude Protein 25%, Fat Content 15%, Crude Ash 7%, Crude Fibres 2.5%, Calcium 1.2%, Phosphorous 0.75%, Omega-3 0.93%, Omega-6 1.8%.

**Composition:** Fresh salmon (26%), rice (26%), chicken meat meal, maize, beet pulp, refined chicken oil, whole dried egg, chicken digest, fish meal, yeast, whole linseed, krill, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 18,000 IU, Vitamin D3 1,350 IU, Vitamin E 240 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 500mg, Copper chelate of amino acid hydrate 100 mg, Manganese chelate of amino acid hydrate 67 mg, Calcium iodate anhydrous 2.4 mg, Selenised Yeast (inactivated) 65 mg. Antioxidant (rosemary extract).

**Feeding quantities:** As well as your dog's body weight; age, activity level, temperament, digestion and rate of metabolism may influence the amount of food required. See chart on page 21 for guidance. **Always ensure fresh, clean drinking water is available. STORE IN A COOL DRY PLACE.**

# adult ●

## rich in fresh pork & rice

Arden Grange ADULT rich in fresh pork & rice is a complete super premium pet food for normally active adult dogs. It contains high quality pork meat in a carefully balanced formulation which is great for dogs requiring a delicious and digestible alternative protein source. Pork provides a nutritionally valuable source of protein and it is a rich natural source of zinc, selenium and the B vitamins. This recipe is also egg and maize free to suit dogs with allergies or intolerances to these ingredients.

**Analytical Constituents:** Crude Protein 25%, Fat Content 16%, Crude Ash 9.5%, Crude Fibres 2.5%, Calcium 2.2%, Phosphorous 1.5%, Omega-3 0.72%, Omega-6 3.34%.

**Composition:** Pork (pork meat meal 24%, fresh pork 19%), rice (26%), sweet potato, refined chicken oil, beet pulp, chicken digest, krill, yeast, whole linseed, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberry, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 18,000 IU, Vitamin D3 1,350 IU, Vitamin E 240 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 500mg, Copper chelate of amino acid hydrate 100 mg, Manganese chelate of amino acid hydrate 67 mg, Calcium iodate anhydrous 2.4 mg, Selenised Yeast (inactivated) 65 mg. Antioxidant (rosemary extract).

## with fresh chicken & rice

Arden Grange PERFORMANCE with fresh chicken & rice for adult dogs has been specially formulated to match the needs of very active or working dogs and needs no further supplementation.

**Analytical Constituents:** Crude Protein 25%, Fat Content 18%, Crude Ash 6.5%, Crude Fibres 2.4%, Calcium 1.4%, Phosphorous 1%, Omega-3 0.91%, Omega-6 3.1%, Taurine 1000 mg/kg, L-carnitine (50mg/kg).

**Composition:** Chicken (chicken meat meal 26%, fresh chicken 5%), rice (26%), maize, refined chicken oil, beet pulp, chicken digest, whole dried egg, yeast, krill, fish meal, whole linseed, minerals, prebiotic FOS, prebiotic MOS, glucosamine (370mg/kg), MSM (370mg/kg), chondroitin (260mg/kg), yucca extract, cranberries, green tea extract (100mg/kg), quercetin (100mg/kg), grape seed extract (100mg/kg), nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 24,000 IU, Vitamin D3 1,800 IU, Vitamin E 750 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 667mg, Copper chelate of amino acid hydrate 133 mg, Manganese chelate of amino acid hydrate 89 mg, Calcium iodate anhydrous 3.2 mg, Selenised Yeast (inactivated) 87 mg. Antioxidant (rosemary extract).

**Feeding quantities:** As well as your dog's body weight; age, activity level, temperament, digestion and rate of metabolism may influence the amount of food required. See chart on page 28 for guidance. **Always ensure fresh, clean drinking water is available. STORE IN A COOL DRY PLACE.**

Arden Grange PERFORMANCE also contains green tea extract, quercetin, grapeseed extract and yucca extract providing further antioxidant support. These potent natural antioxidants inhibit the formation of destructive free radicals that are released during stress or strenuous exercise, making Arden Grange Performance an ideal diet for dogs with a high level of activity.

# premium ●

## rich in fresh chicken & rice

Arden Grange PREMIUM rich in fresh chicken & rice is a complete, super premium pet food for adult dogs. Generous levels of fresh chicken make this a highly palatable and digestible diet which may be particularly beneficial for the more discerning dog! The recipe is also maize free to suit dogs with an allergy or intolerance to this ingredient.

**Analytical Constituents:** Crude Protein 26%, Fat Content 17%, Crude Ash 7%, Crude Fibres 3%, Calcium 1.12%, Phosphorous 0.8%, Omega-3 0.91%, Omega-6 3.1%.

**Composition:** Chicken (fresh chicken 20%, chicken meat meal 20%), rice, potato, refined chicken oil, beet pulp, whole dried egg, chicken digest, fish meal, yeast, krill, whole linseed, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 21,000 IU, Vitamin D3 1,575 IU, Vitamin E 280 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 583mg, Copper chelate of amino acid hydrate 117 mg, Manganese chelate of amino acid hydrate 78 mg, Calcium iodate anhydrous 2.8 mg, Selenised Yeast (inactivated) 76 mg. Antioxidant (rosemary extract).

**Feeding quantities:** As well as your dog's body weight; age, activity level, temperament, digestion and rate of metabolism may influence the amount of food required. See chart on page 28 for guidance. **Always ensure fresh, clean drinking water is available. STORE IN A COOL DRY PLACE.**

# prestige ●

## rich in fresh chicken

Arden Grange PRESTIGE, rich in fresh chicken, is a concentrated recipe designed to fulfil the nutritional needs of dogs with higher requirements for calories, or smaller feeding portions whether a much loved family pet, a working or show dog. The higher protein and fat levels promote excellent condition in a highly digestible form, which is particularly suitable for pregnant or lactating bitches and convalescing dogs. This extremely palatable diet is also suitable for the fussiest eater.

**Analytical Constituents:** Crude Protein 30%, Fat Content 21%, Crude Ash 7%, Crude Fibres 3%, Calcium 1.4%, phosphorous 0.95%, Omega-3 1.21%, Omega-6 2.94%.

**Composition:** Fresh chicken (20%), chicken meat meal (min 20%), rice, maize, refined chicken oil, beet pulp, whole dried egg, fish meal, chicken digest, whole linseed, yeast, krill, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 24,000 IU, Vitamin D3 1,800 IU, Vitamin E 320 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 667mg, Copper chelate of amino acid hydrate 133 mg, Manganese chelate of amino acid hydrate 89 mg, Calcium iodate anhydrous 3.2 mg, Selenised Yeast (inactivated) 87 mg. Antioxidant (rosemary extract).

**Feeding quantities:** As well as your dog's body weight; age, activity level, temperament, digestion and rate of metabolism may influence the amount of food required. See chart on page 28 for guidance. Feeding requirements during the later stages of pregnancy and lactation will be significantly higher.

**Always ensure fresh, clean drinking water is available.**

**STORE IN A COOL DRY PLACE.**

# sensitive ●

## ocean white fish & potato

Arden Grange SENSITIVE ocean white fish & potato is a nutritionally complete dry food which is ideally suited for dogs with a delicate digestion and/or sensitive skin. This cereal and grain free recipe provides all breeds of dog with a wholesome, hypoallergenic diet. Our food ensures a sustained energy release throughout the day and cranberry extract to help maintain urinary tract health. Arden Grange Sensitive provides support to the digestion and immune system to help your dog enjoy optimal health and vitality.

**Analytical Constituents:** Crude Protein 25%, Fat Content 14%, Crude Ash 9%, Crude Fibres 3%, Calcium 2.3%, phosphorous 1.5%, Omega-3 2.2%, Omega-6 1.72%.

**Composition:** Potato (50%), ocean white fish meal (26%), refined chicken oil, beet pulp, whole linseed, chicken digest, whole dried egg, yeast, krill, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

**Vitamins:** Vitamin A 18,000 IU, Vitamin D3 1,350 IU, Vitamin E 240 IU.

**Trace Elements:** Zinc chelate of amino acid hydrate 500mg, Copper chelate of amino acid hydrate 100 mg, Manganese chelate of amino acid hydrate 67 mg, Calcium iodate anhydrous 2.4 mg, Selenised Yeast (inactivated) 65 mg. Antioxidant (rosemary extract).

**Feeding quantities:** As well as your dog's body weight; age, activity level, temperament, digestion and rate of metabolism may influence the amount of food required. See chart on page 28 for guidance. **Always ensure fresh, clean drinking water is available. STORE IN A COOL DRY PLACE.**

# light ●

## with fresh chicken & rice

Arden Grange LIGHT with fresh chicken & rice is lower in protein and oil than our standard adult range. With fewer calories, it can aid in weight reduction and the treatment of obesity. The addition of L-Carnitine helps to increase the conversion of fat to energy and helps maintain lean body mass. Yucca extract is also included, since its antioxidant properties can help to combat the effects of free radicals from which obese animals are more at risk.

**Analytical Constituents:** Crude Protein 18%, Fat Content 7.5%, Crude Ash 6%, Crude Fibres 3.5%, Calcium 0.9%, Phosphorous 0.6%, Omega-3 0.46%, Omega-6 1.63%, L-carnitine (50mg/kg).

**Composition:** Rice (31%), maize (27%), chicken meat meal, beet pulp, fresh chicken (5%), chicken digest, refined chicken oil, yeast, krill, whole dried egg, whole linseed, minerals, prebiotic FOS, prebiotic MOS, yucca extract, glucosamine, MSM, chondroitin, cranberries, nucleotides.

### Additives (per kg)

#### Nutritional Additives

# partners

## benefits

**PARTNERS is the super-premium complete wet food range from Arden Grange that contains natural succulent fresh meat, fish, vegetables, vitamins and minerals delivering a balanced, nutritious and wholesome meal for your dog.**

As they come from Arden Grange, you can be assured of the highest quality, natural ingredients with no artificial colourings, flavourings, preservatives, beef, soya or dairy products. Completely wheat and wheat-gluten free, Arden Grange Partners is a range of naturally hypoallergenic dog foods, which are gentle and easily digested and may help prevent potential allergic reactions.

Choose from a range of delicious recipes including; fresh chicken, rice & vegetables, fresh lamb, rice & vegetables, Sensitive fresh white fish with potato and our new Appetite Plus rich in fresh chicken liquid diet.

High levels of fresh, succulent meat provides an extremely nutritious source of protein to aid muscle development and satisfy even the fussiest eater. With boosted levels of vitamins and minerals in Partners, you can be sure that we have your dogs' health and wellbeing at the forefront of our minds. Chondroitin and glucosamine are included to promote joint and cartilage health so that your dog can enjoy a happy and active life.

True to our core philosophy we include cranberry extract, yucca extract and nucleotides across our whole range of complete dog foods, promoting urinary tract health and aiding digestion.

## benefits

- **Soft consistency** - ideal for dogs suffering from sore mouths, kennel cough, digestive upsets
- **Egg and corn free** - good for dogs requiring a diet which is free from these ingredients
- **Lower calorie than dry food** - ideal for dieting dogs and those with a larger appetite
- **High meat or fish content** - to provide a healthy protein source
- **Higher moisture content than dry food** - may be suitable to aid with mild constipation
- **Low carb** - may be suited to some diabetic dogs and also for dogs who do not thrive on feeds with a moderate to high carb proportion
- **Excellent palatability** - ideal for fussy eaters and recuperating dogs
- **All recipes include** glucosamine, chondroitin, yucca, cranberries and nucleotides.

## partners for the discerning feeder

The high levels of fresh meat in the Arden Grange Partners means that the food is an excellent appetite stimulant. A small amount mixed in with the Arden Grange dry food will often encourage even the fussiest eater to tuck in enthusiastically.

## partners for dieting dogs

As wet foods are lower in calories than their dry counterparts, Arden Grange Partners can also be used as a part of a calorie controlled diet. For dieting dogs, reduce the dry volume by 40g for every ¼ can of Partners added.

All Partners varieties are available in packs of 6 x 395gms recycled steel cans.

breed size	body weight (kgs)	grams per day
toy	2-5	150-300
small	5-10	200-400
medium	10-25	400-800
larger	25-50	800-1200

\*If you are feeding Partners in conjunction with Arden Grange complete dry foods, follow the guidelines on the dry food packaging but reduce the amount of dry fed by 30gms for every ¼ of Partners fed.

# partners

## products

### partners appetite plus

Appetite Plus, the newest addition to Arden Grange's range of super-premium, hypoallergenic tinned dog foods is a complete, highly concentrated liquid diet, suitable for all breeds of dogs and puppies. The recipe contains 22% chicken and 4% chicken livers, which makes it a highly palatable diet for dogs suffering from inappetence or malnutrition. It is also an extremely beneficial solution for puppies who are struggling to make the transition from their mother's milk on to solid foods. The liquid nature of the diet makes it ideal for syringe feeding and it can be easily lapped from a bowl or saucer.

**Analytical Constituents:** Moisture 88%, Crude Protein 4.8%, Fat Content 5.0%, Crude Ash 1.0%, Crude Fibres 0.1%

**Composition:** Chicken (22%), Chicken Livers (4%), Minerals, Dried Whole Egg, Fish Oil, Dried Yeast, Fructooligosaccharide (Prebiotic).

**Additives (per kg):**

**Nutritional Additives:**

**Vitamins:** Vitamin A 1,000 IU, Vitamin D3 150 IU, Vitamin E 100 IU, L-Carnitine 50 mg, Taurine 400 mg.

**Trace Elements:** Zinc chelate of amino acid hydrate 38.5 mg, Zinc sulphate monohydrate 27.8 mg, Ferrous sulphate monohydrate 16.7mg, Selenised yeast inactivated (3b8, 10) 15 mg, Cupric chelate of amino acid hydrate 3.8 mg, Cupric sulphate pentahydrate 3.8 mg, Manganese sulphate monohydrate 3.1 mg, Calcium iodate anhydrous 0.24 mg.

### How to feed Appetite Plus:

Appetite Plus is suitable for short term use in feeding puppies. Whilst the recipe is nutritionally complete, short term feeding is recommended so that puppies can be encouraged to eat solid foods. Appetite Plus can be fed to puppies for up to one month. When feeding adult dogs Appetite Plus it is recommended that it is only fed for a maximum of two months. If fed for longer term, the body condition of the dog needs to be carefully monitored to avoid excessive weight gain.

#### Feeding guide/recommendation

##### For Weaning

Body weight (kg)	0.5	1	1.5	2	2.5
Grams per day	200	330	450	560	660

##### For convalescence if offered as the only food source

Body weight (kg)	1-2	2-3	3-5	5-10	10-20
Grams per day	180-300	300-415	415-610	610-1025	1025-1720

#### Feeding in addition to dry food

**Puppies:** This product can be poured on to dry food to stimulate appetite. **Adult dogs:** Follow the guidelines on the Arden Grange adult dry food bag but reduce the amount of dry food given by 30g for every 120g of Appetite Plus fed.

Always ensure fresh, clean drinking water is available.
